Save To export file	•	•	
Save to multiple export files		•	
Save to alternate export file		•	
Save to print queue		•	
Save As... (opens a dialog)		•	
Error handling options	•	•	
Printing			
Print queues			
Configurable queue file location		•	
Print to label queue	•	•	
Print to card queue	•	•	
Print to edit sheet queue	•	•	
Permit/suppress duplicates option	•	•	
Remove existing duplicates		•	
Print preview	•	•	
Print only selected records from queue		•	
Specify print starting location	•	•	
Label font reset	•		Not Scheduled
Print any output from any queue or MARC file		•	

Bibliofile vs. ITS • forWindows™

Feature	ITS	BiblioFile	Notes
Print jam recovery dialog		•	
Edit queued record		•	
Label configuration	•	•	
Separate field for local information	•		BiblioFile now assumes that barcode, volume, copy, and user-defined fields are all recorded in the same field (e.g., 949) Not Scheduled
Specify subfields to print	•	•	
Specify local information subfields	•	•	
Print branch codes and names	•	•	
Print barcode	•	•	
Multiple Subfield Anchor	•		Not Scheduled
Configuration-specific print subfields		•	ITS setting ("Extracted Subfields") affects all configurations.
Print copy # prefix	•	•	
Print volume # prefix	•	•	
User defined source fields	•	•	
Repeatable field/subfield option	•	•	Implemented in print dialog
Pocket layout	•	•	
Spine layout		•	
Manage label stock		•	
Label stock selector		•	
Page registration adjustment		•	
Specify field for # of sets per copy	•	•	Implemented in print dialog
Specify field for # of sets per volume	•	•	Implemented in print dialog
Omit labels for missing copies/volumes	•	•	Implemented in print dialog
Specify field for copy #s for missing sequences		•	Implemented in print dialog
Predefined label stock layouts		•	
WYSIWYG display of print region boundaries		•	
Unlimited number of print regions		•	
Non-standard label stock support	•		Not planned
Configurable line break	•	•	
Cascaded search for classification	•	•	
Year/Volume No. parsing for LC call numbers	•	•	
Configurable length for Dewey, Local Call #	•	•	
Label stock test	•	•	
Card configuration	•		Not Scheduled. 3x5 "label" configuration available.
Edit sheet configuration	•	•	
Double or single spaced	•	•	
Separate printer per stock type (labels, edit sheets)		•	
Utilities			
Integrated into main program		•	
Tabbed components menus		•	
Batch Export	•	•	
Filter by control number range	•	•	
Filter by date added to database		•	
Filter by date deleted		•	
Filter by last edit date	•	•	

Bibliofile vs. ITS • forWindows™

Feature	ITS	BiblioFile	Notes
Filter by user-defined field	•		Not Scheduled
Filter by branch and collection		•	
Filter by status (Active/Deleted)	•	•	
Filter by record type:			
Bibliographic, Authority	•	•	
Community, Holdings, Classification, Patron	•		Not planned
Unicode encoding specification		•	
Overwrite option	•	•	
Get count	•	•	
Delete from Local Database	•	•	
Batch Import	•	•	
Overwrite option	•	•	
Extended duplicate protection		•	
DOS BiblioFile floppy files	•		Not planned
Help			
Procedures	•	•	
Cataloger's Reference Shelf	•	•	
Context sensitive Help from menus	•	•	
Context sensitive Help in MARC editor	•	•	
Miscellaneous			
Requires database conversion		•	Required if records were saved to Active file.
Physical medium for resource databases	CD-ROM	DVD	
Physical media may be copied to hard drive	•	•	
Physical media must be copied to hard drive		•	
Database engine	Btrieve	PostgreSQL	
Database password protection		•	
Toolbar selection		•	
Toolbar docking/undocking		•	
Z39.50 attribute number display		•	
Full MARC 21 Unicode Compliance		•	
Software tolerates invalid MARC records	•	•	
Holdings Field Setup	•	•	
Branches and Collections	•	•	
Auto Control Numbers	•	•	
Embedded date stamp in auto control numbers		•	
User-definable Field Descriptions	•	•	
Local Database password protection		•	
Export Settings		•	
Import Settings		•
